Starting off tell us a little about yourself. I'm James McGill but I go by J-Mac or Mac in which is my rap name. I have 3 boys, Dallas, Nolan, & Mason, whom I love and adore; they are the reason I go hard in everything I do! I'm humble but confident and I'm passionate about the work I put in as an artist. I love people and try my best to do right by them; growing up I was taught to treat people how you want to be treated and all my life I've lived by that so I show and give love every chance I get!

How long have You been doing music? I've been rapping since 8th grade so about 17 years. I started out writing poetry! I used to come up with poems and read them out loud in class! The class was rocking with them all and that gave me the confidence I needed to keep going further with it. I've always been a great writer, but I had to learn how to incorporate my writing ability into the form of rap. It took time, but I finally got it down pack and I'm getting better with every verse I write.

Who are some people that influenced you to do music? My biggest influencers to do music were T.I, Jeezy, my homie Bo Lewis, and my pops. I came up listening to T.I and Jeezy and they made me want to rap. Bo could rap with the best of them and it would motivate me to go harder when I wrote my raps. My dad was a singer and even though I can't sing lol, he is the reason for my artistic nature.

How would you describe the music you do? Well, I would say that I'm a realist when it comes to the music I make. I love talking about the things I go through as well as what I've seen other people go through. I like to rap and give my perspective on how I see the world from my point of view. I love uplifting and motivating people so I incorporate positivity in my music as well. I don't curse at all and try to come up with creative ways to get my point across.

Anyone can say $1+1=2$ but I love to make people think so if they don't catch something the first time, they'll listen and catch something the next time around. Music like this ages well and stands the test of time! My music is not a vibe, it's a whole life time!

What makes you unique as a artist? What makes me unique as an artist is the fact that I'm me. That's it! No one else can be me and I have that going for myself! I know who I am as a person and as an artist & with me knowing that, I can't lose!

J-MAC

If you could work with any artist who would it be? And why? I can see myself working with someone like J. Cole, Wale, Joyner Lucas, Tay Gram, and Swazy Baby! These artist I've listed are great writers and I feel like we would click instantly coming up with songs! I also think these artist would bring out the best in me.

How do you feel the Internet has impacted the music business? The internet has changed the game to be honest. Marketing and promoting yourself on social media platforms can get you noticed every where across the globe! Anyone can blow up if their song gets in the right person's hands or their following forces the higher ups to come looking for them. But these days artists don't need to sign a deal to be honest. If you have a loyal fan base, the sky is the limit for whatever you want to do.

What's your biggest accomplishments so far? My biggest accomplishment in life so far is being a man of God and being a father to my boys. Nothing will get close to those accomplishments!

What's your goals and plans for the future?

I want to change how people listen to music. We are what we listen to if that makes any sense, if not I'll elaborate on the matter. Growing up, I listened to a lot of trap music so that made me want to trap. I knew that wasn't what I would do but the music influenced me to want to do so. Kids today are beefing and getting killed at an all time high and the reason being is because of what they hear in rap songs. If I can put what I do on the forefront and get the people to push what I do as well, I will change how people listen to music which will make the world a better place. Whoever listens to Mac would want to be a better person and look at things differently after they listen to me. When they listen to me, they'll want to be themselves and know it's ok to do so.

What is one message you would give to your fans? I just want to tell my fans that I'll never cheat them. I'll give 100 percent every time they hear me on a verse. I'm going up every time, I won't be slacking. If I can't give my best work, then I'll keep working until I can give them the best product. I want them to know that I listen to them and want them to be satisfied with the work that I put in. I love them all and I'm excited to put more and more music out there so I can share my experiences with them. Much love!

What first got you into music? Writing got me into music having several attempts at music also got me into music this time i just chose to go solo. See what's shaking

Who inspired you to make music? The inspiration to make music is the people, my people, my kids, I know making music for me can bring a better life. Just took long enough, So the music i make, is definitely for the culture, hip hop's love, Making music

How would you describe the music that you typically create? my creative process would have to be time, feelings, and energy. I make my best music when I'm happy I would have to say, But honestly have never really put my pen to work when life is heavy, only in poetry so I cant wait to see what that brings.

What is your creative process like? I grab a beat that grabs me in some shape or form and study the beat listening to the beat, most times I let the beat tell me my hook. Write, practice it and then lay it. I let the magic work in the studio as far as the polishes.

Who would you most like to collaborate with? If the chance ever came for me to collaborate with someone, I would have to say it's a few and that's a bucket list for me. But on a asap project I would have to say Lil Baby, because everywhere I go I hear him coming outta somebody's speakers which means he got the people listening and I wanna be heard by the people.

If you could go open a show for any artist who would it be? If I could Open a show for someone..... sheesh I really don't know but ima be home minded musically when I say Boosie, T.I, or Jeezy, they raised me if u know what i mean. My favorite male Artists so that would mean a lot.

How do you feel the Internet has impacted the music business? The internet has impacted music in the best way if you ask me. Yeah it's everybody on the internet so unless you do something to go viral I feel like it's still heard for true artists to be heard and acknowledged but on the other hand when you talk about making money off your music it's brilliant still got work hard though. Still can be found in so many places that's held by the internet.so that's dope to me.

What is the best advice you've been given? My best advice right now would have to be my only advice, research and learn for yourself before you say YES.

What is one message you would give to your fans? So the message I want to get to my fans, would be to love you no matter what life brings you because it's up to you but be raw while doing it. Because people accept honest and raw music first.

What are your plans for the future? A Couple plans for the future, definitely my own label, I wanna be on shows and movies for families to watch, with that being said Tyler Perry is someone else im aiming for. Of course making my music big and opening doors for so many others just like me.

SINGING FROM THE
SOUL

BIO

Since the age of 5, while many kids enjoyed gaming or watching TV, Chenier Wilson found excitement through singing. In Queens, NY where he was raised, the church was his audience and it was the breeding grounds for his captivating voice.

His background experience with singing and live performances goes back to the classic school talent shows, singing in gospel choirs and a scholarship which led him to singing in the St. Augustine's College choir. At that point, he realized, it was time to turn this passion into a career, in fact, it was his destiny. Mr. Chenier is now a key name for opening live shows and has been booked for every type of event from family reunions to weddings.

Inspired by the greats like Michael Jackson, Smokey Robinson, Baby Face, Marvin Gaye and Brian McKnight, Mr. Chenier writes all of his music with a mission to spread love through song. He is an all-around entertainer, From music to film, his goal is to represent the Grown and Sexy movement in R&B music to the fullest.

"Whether it's to make love, populate the world, fall in love, or dance in the name of love; at the end of the day it was my music that helped to spread love all over the world."

If you could work with any artist who would it be? And why? That's a hard question because I love music and what I has to offer far as in the people to work with but as in right now K Camp is top of the listen because of the familiarity of the music and I know it would be a great collaboration between us.

What's your biggest accomplishments so far? Biggest accomplishment so far as an artist is getting taken seriously. I think once I was taken serious with my music and the hard work started to show and be recognized. The motivation became bigger because now that's a milestone accomplished.

What's your goals and plans for the future? My goal as an artist is to support my family financially by going living out my dream, and not working a 9-5 to just retire at a certain age and settle. My goal is for my daughter and grandkids to have something that's not apart of the "black man curse" and that's a dream that's being manifested.
